

Amendments to the Abstract

Replace the abstract with the following replacement abstract:

~~The invention relates to a~~ A color chamber doctor blade 1, which has ~~following characteristic features:~~

[[~~-~~]]two doctor blade knives 2 ~~that can be set up~~ oriented in a roof-like fashion against a roller 6,

[[~~-~~]]from which the two doctor blade knives 2 can be fixed on ~~the~~ a doctor blade chamber body 5 by means of a clamping plate 3.

[[~~-~~]]~~whereby the~~ The clamping plate 3 is in active connection with long-stretch fasteners 4 in the axial direction (z) of the roller 6[[~~,~~]].

[[~~-~~]]~~which~~ The long-stretch fasteners are arranged ~~essentially~~ substantially parallel to the clamping plate 3,

[[~~-~~]]and ~~from which~~ apply the force required for fixing at least one doctor blade knife 2 ~~is applied~~. ~~Inventive is that the~~ The resultant of the force exercised by the fasteners 4 points ~~to~~ toward the doctor blade chamber body 5.

~~(Figure 4)~~

For the examiner's convenience, a clean copy of the replacement abstract (which complies with the 37 CFR § 1.72(b) word count requirement) is presented below:

A color chamber doctor blade has two doctor blade knives oriented in a roof-like fashion against a roller, from which the two doctor blade knives can be fixed on a doctor blade chamber body by means of a clamping plate. The clamping plate is in active connection with long-stretch fasteners in the axial direction (z) of the roller. The long-stretch fasteners are arranged substantially parallel to the clamping plate, and apply the force required for fixing at least one doctor blade knife. The resultant of the force exercised by the fasteners points toward the doctor blade chamber body.
